

Maggie Makar

mmakar@mit.edu, mymakar.github.io

Education

Massachusetts Institute of Technology Ph.D, Electrical Engineering and Computer Science	Expected 05/2021
Massachusetts Institute of Technology Master of Science, Electrical Engineering and Computer Science	05/2017
University of Massachusetts, Amherst B.S., Mathematics and Economics, <i>Summa Cum Laude</i>	02/2013

Employment

Research Intern , Google Brain	06/2020 - 09/2020
Research Intern , Microsoft Research	06/2018 - 09/2018
Research Assistant , Brigham and Women's Hospital	02/2013 - 08/2015
Research Assistant , Political Economy Research Institute	09/2012 - 12/2012
Research Intern , Donahue Institute,	08/2012 - 09/2012
Research Assistant , Center for Intelligent Information Retrieval	02/2012 - 08/2012

Ongoing work

1. **M. Makar**, Y. Halpern, B. Packer, A. D'Amour, "Causally-motivated regularization using auxiliary labels".
2. **M. Makar**, L. West, D. Hooper, E. Horvitz, E. Shenoy, J. Guttag, "Exploiting structured data for learning contagious diseases under incomplete testing"
3. F. Kamran, **M. Makar**, J. Wiens, "CASPER: Harmless Adjustment for Confounding in Estimating Individual Treatment Effects"

Peer-reviewed publications

* denotes equal contribution.

1. **M. Makar**, F. Johansson, J. Guttag, D. Sontag, "Estimation of Bounds on Potential Outcomes For Decision Making". *ICML 2020*
2. **M. Makar**, A. Swaminathan, E. Kiciman, "A Distillation Approach to Data Efficient Individual Treatment Effect Estimation". *AAAI, 2019*
3. E. Mu, **M. Makar**, L. West, J. Guttag, D. Rosenberg, E. Shenoy. "Learning the Influence of Individual Clostridioides difficile Infections". *Open Forum Infectious Diseases, 2019*

4. **M. Makar**, J. Guttag, J. Wiens, “Learning the Probability of Activation in the Presence of Latent Spreaders”. *AAAI, 2018 (oral presentation)*
5. J. Oh*, **M. Makar***, et. al, “A generalizable, data-driven approach to predict daily risk of Clostridium difficile infection at two large academic health centers”. *Infection Control and Hospital Epidemiology, 2018*

Workshops and poster sessions

1. *Utility maximizing bounds on potential outcome estimation*. Microsoft AI breakthroughs workshop, 2019.
2. *A distillation approach to data-efficient individual treatment effect estimation*. Machine learning for health workshop, NeuRIPS, 2018.
3. *A distillation approach to data-efficient individual treatment effect estimation* Women in Machine Learning workshop, NeuRIPS, 2018.
4. *Learning the probability of activation in the presence of latent spreaders*. Women in Machine Learning workshop, NeurIPS, 2017.
5. *Learning the probability of activation in the presence of latent spreaders*. Statistics and Data Science conference at MIT, 2017

6. *Estimating the Causal Effect of Lowering Particulate Matter Levels Below the National Ambient Air Quality Standards on Health Outcomes.* Joint Statistical Meeting (JSM), 2016
7. *Impact of a Dedicated Palliative Radiation Oncology Service on the Use of Single-Fraction and Hypofractionated Radiation Therapy Among Patients With Bone Metastases.* ASTRO, San Antonio, November 2015
8. *Learning meaningful representations from medical claims data.* Machine learning for healthcare workshop, NeurIPS, 2015
9. *Short-term mortality prediction for elderly patients using Medicare claims data.* Max Planck Institute, 2015

Invited talks

1. *Learnability of Contagious Infections Under Incomplete Testing.* Microsoft-MIT Trustworthy and Robust AI Collaboration, 2020
2. *Estimation of bounds on potential outcomes.* Microsoft-MIT Trustworthy and Robust AI Collaboration, 2019
3. *A distillation approach to data-efficient individual treatment effect estimation.* Spotlight talk at AAAI, Hawaii, February 2019.
4. *A distillation approach to data-efficient individual treatment effect estimation.* Microsoft Research, Redmond, August 2018.
5. *Spread of Contagions in the Presence of Latent Spreaders: Identifying Hidden Culprits and Learning the Probability of Infection.* University of Massachusetts, Amherst, September 2018
6. *Learning the probability of activation in the presence of latent spreaders.* Spotlight talk at AAAI, Hawaii, February 2018.
7. *Spread of Contagions in the Presence of Latent Spreaders.* Computational Cardiovascular Research Group, MIT, October 2017.
8. *Inference on graphs with missing nodes.* University of Michigan in Ann Arbor, July 2016
9. *Association between the Medicare hospice benefit and health care utilization and costs for patients with poor-prognosis cancer.* Harvard School of Public Health. October 2014

Professional Service

TEACHING

Co-organizer, instructor: Whirlwind of Machine learning, MIT	IAP 2017
Teaching assistant: Machine learning for Healthcare, MIT	Spring 2017

MENTORSHIP

Advaith Anand, Masters of Engineering candidate	2018-2019
Emily Mu, Masters of Engineering candidate	2018-2019
Agni Kumar, Masters of Engineering Candidate	2019-2020
Meghana Kamineni, Undergraduate researcher	2019-Present

REVIEWING

International Conference on Machine Learning (ICML; *Top 5% reviewer award*)
Neural Information Processing Systems (NeurIPS; *Top 5% reviewer award*)
Proceedings of the Association for the Advancement of AI (AAAI)
International Conference on Learning Representations (ICLR)
Journal of Machine Learning Research (JMLR)
Machine Learning for health NeurIPS workshop
Women in Machine Learning NeurIPS workshop
ACM SIGKDD Conference on Knowledge Discovery and Data Mining (KDD)
Journal of Health Economics

Awards

Harvey Fellowship (\$48,000)
Ward McCarthy scholarship
School of Behavioral and Social Sciences scholarship
Economics Department Writing Award
Life Members Scholarship

Computer and Language Skills

Computing: Python, and R
Languages: English, Arabic, and French
